Hussein Khawal El Sultan

US Citizen | husseinkhawalelsultan@email.com | (781)-521-2730 | [Website](#) | [LinkedIn](#) | [GitHub](#)

EDUCATION

University of Massachusetts Boston   **Boston, Massachusetts**
B.S. in Computer Science   *Expected Graduation, May 2024*
- o **Current Cumalitive GPA:** 3.71/4.00

PROJECTS

E-Commerce   *November 2023*
|React, React Router, API, Redux, Firebase, Stripe| *[Github](#)*
- Developed a responsive e-commerce website using React, React-Router, and Redux, with a dynamic UI and comprehensive filtering for enhanced product discoverability
- Implemented a robust product catalog using a custom API, enabling features like user sign-in, cart functionality, and efficient product sorting by various criteria
- Integrated Firebase for seamless user authentication and Stripe for secure payment processing, ensuring a reliable and user-friendly shopping experience

Fitness   *January 2024*
|React, React Router, Rapid API| *[Github](#)*
- Created a multi-page, fully responsive fitness gym website, the design focuses on user engagement and seamless navigation, enhancing the overall user experience
- Integrated Rapid API allowing users to search for exercises targeting specific body parts. Each exercise includes detailed descriptions, animated GIFs for visual guidance, and targeted body part information
- Enhanced user interaction by embedding instructional videos, offering step-by-step guides for performing exercises

Portfolio   *October 2023*
|React, AOS Library| *[Github](#)*
- Created a React-based personal portfolio website showcasing a user-friendly interface to introduce myself and highlight my technical skills and projects
- Implemented responsive design for optimal user experience and modern web aesthetics

FundFlow   *August 2023*
|HTML, CSS, Javascript| *[Github](#)*
- Developed a user-centric banking application using HTML, CSS, and JavaScript, emphasizing the implementation of arrays and data structures to enhance functionality
- Implemented key features allowing users to securely log in, transfer funds to other users, request loans, and manage accounts, alongside a robust sorting system for transactions
- Integrated an automatic logout timer to ensure user security during periods of inactivity, demonstrating a commitment to safe and reliable user experiences

EXPERIENCE

Amazon   **Everett, MA**
Warehouse Associate   *December 2020 - Current*
- Demonstrated exceptional attention to detail and organizational skills in managing and executing order fulfillment tasks, including packing, inventory organization, and loading
- Thrived in a fast-paced, dynamic environment, emphasizing teamwork, customer-focused service, and maintaining optimal workplace standards through cleanliness and organization

SymmetryScience Group   **Boston University (Remote)**
Video Annotator   *February - June 2023*
- Analyzed medication effects on subjects by observing and meticulously annotating their movements during sleep, in collaboration with a multidisciplinary team
- Maintained data accuracy and provided key insights on behavior patterns, contributing to research outcomes and participating in team discussions about observed medication side effects

SKILLS

Programming: React, JavaScript, HTML, CSS, Bootstrap, Redux, Git, Github, Firebase, Figma, VSCode
